- (b) Hail.
- (c) Water which through flood has overflowed beyond the normal boundaries of river, water course, lake or sea or by abnormal flow of drainage water from watershed areas on high ground outside the paddock in which the wheat is growing but excluding seepage and/or artesian water.
- (d) Wandering stock not belonging to or under the control of the Insured provided always that the paddock in which the wheat is growing is adequately fenced.
- (e) Snow.
- (f) Frost
Subject always to the Insured obtaining a written certificate from a Crown Research Institute or other qualified authority as the Insurer may direct that frost was the cause of the loss or damage.

- (g) Overturning of any land vehicle or collision of any land vehicle with any object other than with the Interests insured hereunder.
- (h) Aircraft and other Aerial or Spatial devices and/or articles dropped therefrom.
- (i) Earthquake, volcanic eruption, subsidence or land slip.

Notwithstanding the foregoing no liability shall attach under the Defined Events for any loss or damage under (b), (c), or (e) occurring after the 15 May in any growing season, and (f) Frost, occurring before 15th November 2024.

2. RESOWING EXTENSION

Notwithstanding anything to the contrary contained in the Period of Insurance in the event of loss or damage to a sown wheat crop resulting prior to the 1st November in any growing season, and arising from defined events (c) or (d), the indemnity provided by this Contract of Insurance is extended to include:

EITHER

the cost of application of fertiliser and/or fungicides or other remedies to the damaged crop

OR

the cost of preparing the soil and resowing the wheat.

But only to the extent that would normally have been expended in preparing and sowing had loss or damage not occurred and only if the loss or damage was caused by one of the Defined Events in Section 1(1) hereof.

It is further agreed that in the event of Wheat not being able to be resown then following the written consent of the Insurer this extension shall apply to such other crop as is planted provided that the liability of the Contract of Insurance is limited to those costs incurred in the resowing of the alternative crop whichever sum is the lesser.

Claims under this extension will only be considered by the Insurer where meeting such losses, as defined above, is recommended by an authorised United Wheat Scheme assessor.

3. LIMIT OF LIABILITY

The liability of the insurer under this Section shall be limited to:

- (a) A value of **\$245 per tonne** of wheat which would have otherwise been harvested and/or
- (b) A value of **\$245 per tonne** in diminution of the value of wheat which has been harvested.

Provided always the loss or damage results from the happening of a Defined Event as detailed in Section 1 of this Contract of Insurance.

If the total of all losses in one season exceeds the Maximum Liability of \$8m all losses for any one season, the amount payable to each grower shall be reduced to the proportion that the amount their loss bears to all the losses for the season against the Maximum Liability any one season. E.g. if the insured grower's loss is 5% of all the losses, then they would be paid 5% of \$8m.

Further in respect of the resowing extension the Limit of Liability is restricted to those costs incurred in resowing the direct area of land involved provided always the total of such costs does not exceed the sum resulting from the application of the anticipated yield of the area resown times the limit of liability as applicable to wheat.

4. EXCLUSIONS

No claim shall be payable under Section 1 of this Contract of Insurance.

- (a) Unless the wheat is harvested, or the land is occupied by the crop until the normal time of harvest or such earlier time as the Insurer may permit.
- (b) If the loss or damage being caused by flood was the result of negligent farming (which expression shall be deemed to include the growing of wheat in recognised flood prone areas), neglect of water courses or other negligence on the part of the Insured. For the purposes of this exception a flood prone area is that area of land which has flooded during a wheat growing season more regularly than once in ten years preceding the loss or damage and for which claims have been made under this or any other form of insurance or compensation scheme.
- (c) If the loss or damage being caused by frost was the result of planting wheat in frost prone areas, such areas being agreed as such by both the Insurer and the United Wheatgrowers (NZ) Ltd and declared by endorsement to this Contract of Insurance.
- (d) Unless samples of frost damage wheat are taken for assessment of damage, or an assessment of wheat damaged by other causes is made by the Insurer's Assessors prior to actual harvest of the damaged wheat crop.
